Achievements

Full-Stack Developer (Intern)   **Vault Of Codes**   **01/05/2025 - CURRENT**

| May 2025 – June 2025
Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), WordPress.

- Built 5 full-stack applications from scratch using MERN and integrated third-party APIs, reducing development time by **20%**.
- Developed internal CMS tools and dashboards with WordPress and PHP for 3 clients, improving admin efficiency by **35%**.
- Wrote reusable front-end components in React.js, leading to **50% faster UI development**.
- Migrated static sites to dynamic WordPress-based platforms with custom themes.

Artificial Intelligence   **09/07/2025 - CURRENT**

HP LIFE (Hewlett-Packard Learning Initiative For Entrepreneurs)
Completed: [July, 2025]

- Covered AI fundamentals, practical applications, and ethical considerations.
- Developed understanding of AI's role in business and innovation.

Cybersecurity Virtual Job Simulation   **29/06/2025 - CURRENT**

Deloitte (via Forage)
Completed: [June 2025]

- Completed real-world tasks simulating Deloitte's cybersecurity operations.
- Gained hands-on experience in threat detection, incident response, and risk assessment.
- Developed understanding of SOC (Security Operations Center) processes and security best practices.

Technology Virtual Job Simulation   **29/06/2025 - CURRENT**

Deloitte (via Forage)
Completed: [June 2025]

- Completed real-world tasks simulating Deloitte's technology consulting services.
- Gained insight into IT transformation, digital strategy, and client technology solutions.
- Developed skills in stakeholder analysis, project planning, and innovative problem-solving.
- Applied structured thinking to solve client business challenges using tech solutions.

.

Projects

Infinite Draw   **Technology: React.js, TypeScript, Redux Toolkit, Html Canvas, Tailwind, Css**

- An Infinite canvas drawing App, implemented in **React, TypeScript,t with Redux toolkit** for State Management.
- Feature implemented: **Zoom in + Zoom out**, **panning, Moving Elements on the canvas freely**, **editing properties of the Elements**
- **Added Type safety with the use of TypeScript.**

Pictofy Github
(On Going)   **Technology Used: NextJs, Typescript, Zod, TanstackTable, NextAuth context Api, MongoDB**

- **Built a full-stack project like-image sharing platform from scratch.**
- **Implemented secure user authentication using Passsport.js with Local Strategy(email&password).**
- **Created features like user registration/login, image uploads,post saving,and profile-based boards.**
- **Designed dynamic pages using EJS Templates and RESTful routing with Express.**
- **Stored and managed user data and posts using MongoDB and Mongoose ODM.**
